#Test scenarios

#Account creation from web

Feature: E-mail validation in main page from web
Try to create account from account creation through email form

Background:
  Given I access "https://app.kinvo.com.br/

Scenario: Invalid e-mail validation in main page from web
  When I insert a invalid e-mail on e-mail field
  And click on "Cadastrar" button
  Then I should see a invalid e-mail message

Scenario: Valid e-mail validation in main page from web
  When I insert a invalid e-mail on e-mail field
  And click on "Cadastrar" button
  Then I should see the account creation page

Feature: First name field validation in the account creation form from web
Try to fill the first name field with different type of information to validate whether it was developed properly

Background:
  Given I access "https://app.kinvo.com.br/inscreva-se"

Scenario: Clear first name field validation from web
  When I fill the first name field with some information
  And I clear the field
  Then I should see the warning message "Por favor, digite seu nome"

Scenario: Over the Maxlength first name field validation from web
  When I try fill the first name field with more than 100 characters
  Then The field should stop the insertion on 100 characters

Scenario: Maxlength first name field validation from web
  When I fill the first name field with 100 characters
  Then every characters should be inserted in first name field

Scenario: Number insertion in first name field from web
  When I try to insert number in first name field
  Then It should be not possible to insert number in first name field

Scenario: Special character insertion in first name field from web
  When I try to insert special character in first name field
  Then It was not possible to insert number in first name field

Feature: Last name field validation in the account creation form from web
Try to fill the last name field with different type of information to validate whether it was developed properly

Background:
  Given I access "https://app.kinvo.com.br/inscreva-se"

Scenario: Clear last name field validation from web
 When I fill the last name field with some information
 And I clear the field
 Then I should see the warning message "Por favor, digite seu sobrenome"

Scenario: Over the Maxlength last name field validation from web
 When I try fill the last name field with more than 100 characters
 Then The field should stop the insertion on 100 characters

Scenario: Maxlength last name field validation from web
 When I fill the last name field with 100 characters
 Then every characters should be inserted

Scenario: Number insertion in last name field from web
 When I try to insert number in last name field
 Then It was not possible to insert number in last name field

Scenario: Special character insertion in last name field from web
 When I try to insert special character in last name field
 Then It was not possible to insert number in last name field

Feature: E-mail field validation in the account creation form from web
Try to fill the email field with different type of information to validate whether it was developed properly

Background:
  Given I access "https://app.kinvo.com.br/inscreva-se"

Scenario: Clear email field validation from web
 When I fill the email field with some information
 And I clear the field
 Then I should see the warning message "Por favor, digite seu endereço de email"

Scenario: Over the Maxlength email field validation from web
 When I try fill the email field with more than 160 characters
 Then The field should stop the insertion on 160 characters

Scenario: Maxlength email field validation from web
 When I fill the email field with 160 characters
 Then every characters should be inserted in email field

Scenario Outline: Email format validation in email field from web
 When I set email address field with "<Format>"
 Then The warning message "Este email não é válido" should be showed
 Examples:
 | Format |
 | abcd |
 | abcd@ |
 | abcd@domain |
 | abcd@domain. |
 | abcd@domain.. |
 | abcd@@domain |
 | abcd@domain@com |
 | abcd@domain.abcd@domain. |

Feature: Password field validation in the account creation form from web
 Try to fill the password field with different type of information to validate whether it was developed properly

 Background:
  Given I access "https://app.kinvo.com.br/inscreva-se"

 Scenario: Clear password field validation from web
  When I fill the password field with some information
  And I clear the field
  Then I should see the warning message "Por favor, digite sua senha."
  And I should see a image indicating the wrong insertion next to the label "Mínimo de 8 caracteres"
  And I should see a image indicating the wrong insertion next to the label "Pelo menos 1 letra maiúscula"
  And I should see a image indicating the wrong insertion next to the label "Pelo menos 1 letra minúscula"
  And I should see a image indicating the wrong insertion next to the label "Ao menos um número"
  And I should see a image indicating the wrong insertion next to the label "Pelo menos 1 Caracter especial"

 Scenario: Password field instructions validation from web
  When I click on the password field
  Then I should see the password instructions bellow

 Scenario: Password without capital letter validation in password field from web
  When I set the password "abc@123."
  Then I should see a image indicating the wrong insertion next to the label "Pelo menos 1 letra maiúscula"
  And I should see a checked image next to the label "Mínimo de 8 caracteres"
  And I should see a checked image next to the label "Pelo menos 1 letra minúscula"
  And I should see a checked image next to the label "Ao menos um número"
  And I should see a checked image next to the label "Pelo menos 1 Caracter especial"

Scenario: Password without at least 8 characters format validation in password field from web
  When I set the password "Aa1!sw2"
  Then I should see a checked image next to the label "Pelo menos 1 letra maiúscula"
  And I should see a image indicating the wrong insertion next to the label "Mínimo de 8 caracteres"
  And I should see a checked image next to the label "Pelo menos 1 letra minúscula"
  And I should see a checked image next to the label "Ao menos um número"
  And I should see a checked image next to the label "Pelo menos 1 Caracter especial"

 Scenario: Password without lowercase letter validation in password field from web
  When I set the password "ABC@123."
  Then I should see a checked image next to the label "Pelo menos 1 letra maiúscula"
  And I should see a checked image next to the label "Mínimo de 8 caracteres"
  And I should see a image indicating the wrong insertion next to the label "Pelo menos 1 letra minúscula"
  And I should see a checked image next to the label "Ao menos um número"
  And I should see the a checked image next to the label "Pelo menos 1 Caracter especial"

 Scenario: Password without number validation in password field from web
  When I set the password "ABC@abc."
  Then I should see a checked image next to the label "Pelo menos 1 letra maiúscula"
  And I should see a checked image next to the label "Mínimo de 8 caracteres"
  And I should see a checked image next to the label "Pelo menos 1 letra minúscula"
  And I should see a image indicating the wrong insertion next to the label "Ao menos um número"
  And I should see a checked image next to the label "Pelo menos 1 Caracter especial"

 Scenario: Password without special character validation in password field from web
  When I set the password "ABC123abc"
  Then I should see a checked image next to the label "Pelo menos 1 letra maiúscula"
  And I should see a checked image next to the label "Mínimo de 8 caracteres"
  And I should see a checked image next to the label "Pelo menos 1 letra minúscula"
  And I should see a checked image next to the label "Ao menos um número"
  And I should see a image indicating the wrong insertion next to the label "Pelo menos 1 Caracter especial"

Feature: Send non-compliant data in the account creation form from web
 Try to send a non-compliant form

 Background:
  Given I access "https://app.kinvo.com.br/inscreva-se"

 Scenario: Empty form validation from web
  When I do not fill any form field
  Then I should see the "Criar conta" button disable

Scenario: Empty fields form validation from web
 When I click on "Concordo com os Politica de Privacidade" button
 And I click on "Concordo com os Termos de Uso" button
 And I check on "Não sou um robô"
 Then I should see the "Criar conta" button disable

Scenario Outline: Empty field form validation from web
 When I fill the form without insert the <Field>
 And I click on "Concordo com os Politica de Privacidade" button
 And I click on "Concordo com os Termos de Uso" button
 And I check on "Não sou um robô"
 Then I should see the "Criar conta" button disable
 Examples:
  | Field |
  | First name |
  | Last name |
  | E-mail |
  | Password |

Scenario Outline: wrong field insertion form validation
 When I fill the form with the <Field> inserted wrongly
 And I click on "Concordo com os Politica de Privacidade" button
 And I click on "Concordo com os Termos de Uso" button
 And I check on "Não sou um robô"
 Then I should see the "Criar conta" button disable
 Examples:
  | Field |
  | First name |
  | Last name |
  | E-mail |
  | Password |

Feature: Account creation form from web
 Create a user account properly

Background:
 Given I access "https://app.kinvo.com.br/inscreva-se"

Scenario: Validate form insertion
 When I set valid data in First name field
 And I set valid data in Last name field
 And I set valid data in E-mail field
 And I set valid data in password field
 And I click on "Concordo com os Politica de Privacidade" button
 And I click on "Concordo com os Termos de Uso" button
 And I check on "Não sou um robô"
 Then I should see the "Criar conta" button enable

Scenario: Validate form insertion
 When I set valid data in First name field
 And I set valid data in Last name field
 And I set valid data in E-mail field
 And I set valid data in password field
 And I click on "Concordo com os Politica de Privacidade" button
 And I click on "Concordo com os Termos de Uso" button
 And I check on "Não sou um robô"
 And I should see the "Criar conta" button enable
 Then I should see the message "Cadastro realizado com sucesso"
 And I should receive a token at the email account

#Account creation from app

Feature: First name field validation in the account creation form from app
 Try to fill the first name field with different type of information to validate whether it was developed properly

 Background:
 Given I download Kinvo app at PlayStore
 And I open the app
 And I click on "Avançar"
 And I click on "Avançar"
 And I click on "Começar"
 And I click on "Criar conta"

 Scenario: Clear first name field validation in app
 When I fill the first name field with some information
 And I clear the field
 Then I should see the warning message "Este campo é requerido"

 Scenario: Over the Maxlength first name field validation in app
 When I fill the first name field with more than 30 characters
 Then I should see the warning message "O nome não pode ter mais de 30 caracteres"

 Scenario: Maxlength first name field validation in app
 When I fill the first name field with 30 characters
 Then every characters should be inserted in first name field

 Scenario: Number insertion in first name field in app
 When I insert numbers in first name field
 Then I should see the warning message "O nome não pode ter número"

 Scenario: Special character insertion in first name field in app
 When I insert special characters in first name field
 Then I should see the warning message "O nome não pode ter caractere especial"

Feature: Last name field validation in the account creation form from app
 Try to fill the last name field with different type of information to validate whether it was developed properly

 Background:
  Given I download Kinvo app at PlayStore
  And I open the app
  And I click on "Avançar"
  And I click on "Avançar"
  And I click on "Começar"
  And I click on "Criar conta"

 Scenario: Clear last name field validation in app
  When I fill the last name field with some information
  And I clear the field
  Then I should see the warning message "Este campo é requerido"

 Scenario: Over the Maxlength last name field validation in app
  When I try fill the last name field with more than 30 characters
  Then I should see the warning message "O nome não pode ter mais de 30 caracteres"

 Scenario: Maxlength last name field validation in app
  When I fill the last name field with 30 characters
  Then every characters should be inserted

 Scenario: Number insertion in last name field in app
  When I insert numbers in last name field
  Then I should see the warning message "O nome não pode ter number"

 Scenario: Special character insertion in last name field in app
  When I insert special characters in last name field
  Then I should see the warning message "O nome não pode ter caractere especial"

Feature: Validate data in the first screen of account creation form from app
 Validate data in First name and Last name screen

 Background:
  Given I download Kinvo app at PlayStore
  And I open the app
  And I click on "Avançar"
  And I click on "Avançar"
  And I click on "Começar"
  And I click on "Criar conta"

 Scenario: Empty first and last name on form in app
  When I do not fill any field
  Then I should see the "Avançar" button disable
  And I should see the screen indicator in the screen 1

Scenario Outline: One empty field form validation in app
 When I fill the form without insert the <Field>
 Then I should see the "Avançar" button disable
 Examples:
 | Field |
 | First name |
 | Last name |

 Scenario: wrong field insertion form validation in app
 When I fill the form with the <Field> inserted wrongly
 Then I should see the "Avançar" button disable
 Examples:
 | Field |
 | First name |
 | Last name |

 Scenario: Insert valid first and last name data in app
 When I fill valid data in first name field
 And I fill valid data in first name field
 Then I should see the "Avançar" button enable

 Scenario: Pass to e-mail screen in app
 When I fill valid data in first name field
 And I fill valid data in first name field
 And click on "Avançar"
 Then I should see the e-mail screen
 And I should see the screen indicator in the screen 2

 Feature: E-mail field validation in the account creation form from app
 Try to fill the email field with different type of information to validate whether it was developed properly

 Background:
 Given I download Kinvo app at PlayStore
 And I open the app
 And I click on "Avançar"
 And I click on "Avançar"
 And I click on "Começar"
 And I click on "Criar conta"
 And I insert valid data in first name and last name field and pass to next screen

 Scenario: Empty email on form in app
 When I do not fill e-mail field
 Then I should see the "Avançar" button disable

 Scenario: Clear email field validation from app
 When I fill the email field with some information

And I clear the field
Then I should see the warning message "Este campo é requerido"
And I should see the "Avançar" button disable

Scenario Outline: Email format validation in email field from app
When I set email address field with "<Format>"
Then I should see the warning message "Por favor, informe um e-mail válido"
And I should see the "Avançar" button disable
Examples:
| Format |
| abcd |
| abcd@ |
| abcd@domain |
| abcd@domain. |
| abcd@domain.. |
| abcd@@domain |
| abcd@domain@com |
| abcd@domain.abcd@domain. |

Scenario: Insert valid e-mail data in app
When I insert a valid e-mail
Then I should see the "Avançar" button enable

Scenario: Pass to password screen in app
When I insert a valid e-mail
And click on "Avançar"
Then I should see the password screen
And I should see the screen indicator in the screen 3

Feature: Password field validation in the account creation from app
Try to fill the password field with different type of information to validate whether it was developed properly

Background:
Given I download Kinvo app at PlayStore
And I open the app
And I click on "Avançar"
And I click on "Avançar"
And I click on "Começar"
And I click on "Criar conta"
And I insert valid data in first name and last name field and pass to next screen
And I insert valid data in e-mail field and pass to next screen

Scenario: Empty password field validation from app
When I do not fill the password field
Then I should see the password instructions bellow without check
And I should see the "Avançar" button disable

Scenario: Clear password field validation from app
 When I fill the password field with some information
 And I clear the field
 Then I should see the password instructions bellow without check
 And I should see the "Avançar" button disable

 Scenario: Password without special character validation in password field from app
 When I set the password "ABC123abc"
 Then I should see a image indicating the wrong insertion next to the label "Ao menos um caractere especial"
 And I should see a checked image next to the label "Ao menos uma letra maiúscula"
 And I should see a checked image next to the label "Ao menos uma letra minúscula"
 And I should see a checked image next to the label "Ao menos um número"
 And I should see a checked image next to the label "Mínimo de 8 caracteres"
 And I should see the "Avançar" button disable

 Scenario: Password without capital letter validation in password field from app
 When I set the password "abc@123."
 Then I should see a checked image next to the label "Ao menos um caractere especial"
 And I should see a image indicating the wrong insertion next to the label "Ao menos uma letra maiúscula"
 And I should see a checked image next to the label "Ao menos uma letra minúscula"
 And I should see a checked image next to the label "Ao menos um número"
 And I should see a checked image next to the label "Mínimo de 8 caracteres"
 And I should see the "Avançar" button disable

 Scenario: Password without lowercase letter validation in password field from app
 When I set the password "ABC@123."
 Then I should see a checked image next to the label "Ao menos um caractere especial"
 And I should see a checked image next to the label "Ao menos uma letra maiúscula"
 And I should see a image indicating the wrong insertion next to the label "Ao menos uma letra minúscula"
 And I should see a checked image next to the label "Ao menos um número"
 And I should see a checked image next to the label "Mínimo de 8 caracteres"
 And I should see the "Avançar" button disable

 Scenario: Password without number validation in password field from app
 When I set the password "ABC@abc."
 Then I should see a checked image next to the label "Ao menos um caractere especial"
 And I should see a checked image next to the label "Ao menos uma letra maiúscula"
 And I should see a checked image next to the label "Ao menos uma letra minúscula"
 And I should see a image indicating the wrong insertion next to the label "Ao menos um número"
 And I should see a checked image next to the label "Mínimo de 8 caracteres"
 And I should see the "Avançar" button disable

 Scenario: Password without at least 8 characters validation in password field from app
 When I set the password "Aa1!sw2"

Then I should see a checked image next to the label "Ao menos um caractere especial"
And I should see a checked image next to the label "Ao menos uma letra maiúscula"
And I should see a checked image next to the label "Ao menos uma letra minúscula"
And I should see a checked image next to the label "Ao menos um número"
And I should see a image indicating the wrong insertion next to the label "Mínimo de 8 caracteres"
And I should see the "Avançar" button disable

Scenario: Valid Password from app
When I set valid password
Then I should see a checked image next to the label "Ao menos um caractere especial"
And I should see a checked image next to the label "Ao menos uma letra maiúscula"
And I should see a checked image next to the label "Ao menos uma letra minúscula"
And I should see a checked image next to the label "Ao menos um número"
And I should see a a checked image next to the label "Mínimo de 8 caracteres"
And I should see the "Avançar" button enable

Scenario: Valid Password from app
When I set valid password
And I click on "Avançar" button
Then I should see Terms and Politics screen
And I should see the screen indicator in the screen 4

Feature: Terms and politics screen validation from app

Background:
Given I download Kinvo app at PlayStore
And I open the app
And I click on "Avançar"
And I click on "Avançar"
And I click on "Começar"
And I click on "Criar conta"
And I insert valid data in first name and last name field and pass to next screen
And I insert valid e-mail and pass to next screen
And I insert valid password and pass to next screen

Scenario: Buttons not clicked on Terms and Politics screen from app
When I do not click on "Concorda com a Política de Privacidade" button
And I do not click on "Concorda com os Termos de Uso" button
Then I should see the "Criar conta" button disable

Scenario: One button not clicked on Terms and Politics screen from app
When I do not click on <Button> button only
Then I should see the "Criar conta" button disable
Examples:
| Button |
| "Concorda com a Política de Privacidade" |
| "Concorda com os Termos de Uso"|

Scenario: Buttons clicked on Terms and Politics screen from app
 When I click on "Concorda com a Política de Privacidade" button
 And I click on "Concorda com os Termos de Uso" button
 Then I should see the "Criar conta" button enable

 Scenario: Create accont from app
 When I click on "Concorda com a Política de Privacidade" button
 And I click on "Concorda com os Termos de Uso" button
 And I click on "Criar conta" button
 Then I should see the message "Cadastro realizado com sucesso"
 And I should receive a token at the email account

#Add Active from web

#Add Stocks, BDR, ADR, FII e Reits
Feature: Validate placeholder name from web

 Background:
  Given I logged in kinvo from web
  And I click on "Gerenciar ativos"
  And I click in "Adicionar produto"

 Scenario: Search pre saved placeholder name from web
  When I set part of some placeholder name in placeholder field
  Then I should see a list of full name of placeholder with the part inserted in the placeholder name field

 Scenario: Insert pre saved placeholder name from web
  When I set part of some placeholder name in placeholder field
  And I choose a full name of one placeholder
  Then The full placeholder name should be inserted in the placeholder name field

 Scenario: Search non pre saved placeholder from web
  When I set some name different from any part of placeholder's name in placeholder field
  Then I should see the message "Nada encontrado"
  And The data should keep in the placeholder field

 Scenario: Over the Maxlength placeholder field validation from web
  When I try fill the placeholder field with more than 100 characters
  Then The field should stop the insertion on 100 characters

 Scenario: Maxlength placeholder field validation from web
  When I fill the placeholder field with 100 characters
  Then every characters should be inserted

Feature: Validate ticker from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"

Scenario: Search pre saved ticker from web
 When I set part of some ticker in tricker field
 Then I should see a list of full name of tickers with the part inserted in the ticker field

Scenario: Insert pre saved ticker from web
 When I set part of some ticker in tricker field
 And I choose a full name of one ticker
 Then The full ticker name should be inserted in the ticker name field

Scenario: Search non pre saved ticker from web
 When I set some name different from any part of ticker's name in tricker field
 Then I should see the message "Nada encontrado"
 And The data should keep in the ticker field
 And I should see the message "Selecione o ativo"

Scenario: Over the Maxlength tricker field validation from web
 When I try fill the tricker field with more than 25 characters
 Then The field should stop the insertion on 25 characters

Scenario: Maxlength tricker field validation from web
 When I fill the tricker field with 25 characters
 Then every characters should be inserted

 Feature: Validate quantity from web

 Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"

Scenario: Insert letter in quantity field from web
 When I try to set letters in quantity field
 Then It should be not possible insert letter in quantity field

Scenario: Insert special character in quantity field from web
 When I try to set special character in quantity field
 Then It should be not possible insert special character in quantity field

Scenario Outline: Insert number in quantity field from web
 When I set <number> in quantity field
 Then I should insert <number> in quantity field
 Examples:

| number |
| 0 |
| 1.4 |
| 1,5 |
| 13414 |

Scenario: Validate zero in quantity field from web
 When I set "0" in quantity field
 And I fill the form
 And I click on "Cadastrar" button
 Then It should see a pop-up with a message "Quantidade deve ser maior do que zero."

Feature: Validate price from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"

Scenario: Insert letter in price field from web
 When I try to set letters in price field
 Then It should be not possible insert letter in price field

Scenario: Insert special character in price field from web
 When I try to set special character in price field
 Then It should be not possible insert special character in price field

Scenario Outline: Insert number in price field from web
 When I set <number> in price field
 Then I should insert <number> in price field
 Examples:
 | number |
 | 0 |
 | 12 |
 | 158 |
 | 1578 |
 | 13414 |
 | 1347014 |

Scenario: Validate zero in price field from web
 When I set "0" in price field
 And I fill the form
 And I click on "Cadastrar" button
 Then It should see a pop-up with a message "O valor da movimentação deve ser maior que zero."

Feature: Validate time from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"

 Scenario: Insert letter in time field from web
 When I try to set letters in time field
 Then It should be not possible insert letter in time field

 Scenario: Insert special character in time field from web
 When I try to set special character in time field
 Then It should be not possible insert special character in time field

 Scenario: Insert invalid time in time field from web
 When I set an invalid time in time field
 Then I should see a warning message "INFORME UMA DATA VÁLIDA."

 Scenario: Validate no time in time field from web
 When I do not set time field
 And I fill the form
 And I click on "Cadastrar" button
 Then It should see a warning message "INFORME A DATA DA APLICAÇÃO."

 Feature: Validate stocks form from web

 Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"

Scenario Outline: Empty field form validation from web
 When I fill the form without insert only the <Field>
 And I click on "Cadastrar" button
 Then I should not add a new active
 Examples:
 | Field |
 | Ativo |
 | Quantidade |
 | Cotação |
 | Data de início |

Scenario Outline: Wrong data field form validation from web
 When I fill the form with a wrong data only in the <Field>
 And I click on "Cadastrar" button
 Then I should not add a new active
 Examples:
 | Field |
 | Ativo |

| Quantidade |
| Cotação |
| Data de início |

Scenario: Add stocks from web
 When I fill the form with valid data
 And I click on "Cadastrar" button
 Then I should see a pop-up with a message "Produto cadastrado com sucesso!"
 And I should see a warning pop-up with a message "Consolidação necessária. Clique aqui para recarregar a página."

#Add fund
Feature: Validate placeholder name in fund from web

 Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"
 And I click in "Fundo"

 Scenario: Search pre saved placeholder name in fund from web
 When I set part of some placeholder name in placeholder field
 Then I should see a list of full name of placeholder with the part inserted in the placeholder name field

 Scenario: Insert pre saved placeholder name in fund from web
 When I set part of some placeholder name in placeholder field
 And I choose a full name of one placeholder
 Then The full placeholder name should be inserted in the placeholder name field

 Scenario: Search non pre saved placeholder in fund from web
 When I set some name different from any part of placeholder's name in placeholder field
 Then I should see the message "Nada encontrado"
 And The data should keep in the placeholder field
 And I should see the warning message "SELECIONE UMA INSTITUIÇÃO FINANCEIRA"

 Scenario: Over the Maxlength placeholder field validation in fund from web
 When I try fill the placeholder field with more than 100 characters
 Then The field should stop the insertion on 100 characters

 Scenario: Maxlength placeholder field validation in fund from web
 When I fill the placeholder field with 100 characters
 Then every characters should be inserted

 Feature: Validate fund in fund from web

 Background:
 Given I logged in kinvo from web

And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"

Scenario: Search pre saved fund name in fund from web
When I set part of some fund name in fund field
Then I should see a list of full name of fund with the part inserted in the fund name field
Scenario: Search pre saved fund cnpj in fund from web
When I set part of some fund cnpj in fund field
Then I should see a list of full name of fund with the part inserted in the fund name field

Scenario: Insert pre saved fund name in fund from web
When I set part of some fund name in fund field
And I choose a full name of one fund
Then The full fund name should be inserted in the fund name field

Scenario: Search non pre saved fund name in fund from web
When I set some name different from any part of fund's name
Then I should see the message "Nada encontrado"
And The data should keep in the fund field
And I should see the warning message "SELECIONE UM FUNDO"

Scenario: Search non pre saved fund cnpj in fund from web
When I set some cnpj different from any part of fund's cnpj
Then I should see the message "Nada encontrado"
And The data should keep in the fund field
And I should see the warning message "SELECIONE UM FUNDO"

Scenario: Over the Maxlength fund field validation in fund from web
When I try fill the fund field with more than 100 characters
Then The field should stop the insertion on 100 characters

Scenario: Maxlength fund field validation in fund from web
When I fill the fund field with 100 characters
Then every characters should be inserted

Feature: Validate apply in fund from web

Background:
Given I logged in kinvo from web
And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"

Scenario: Do not select any option in apply from web
When I do not select any option in apply field
And I fill the form
And I click in "Cadastrar"

Then I should see a warning message "SELECIONE O TIPO DE APLICAÇÃO"

Scenario: Select any option in apply from web
When I select some option in apply field
Then The selected option should be inserted

Feature: Validate applied value in fund from web

Background:
Given I logged in kinvo from web
And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"
And I select "Por valor" option in apply in "Aplicar por"

Scenario: Insert letter in applied value field from web
When I try to set letters in applied value field
Then It should be not possible insert letter in applied value field

Scenario: Insert special character in applied value field from web
When I try to set special character in applied value field
Then It should be not possible insert special character in applied value field

Scenario Outline: Insert number in applied value field from web
When I set <number> in applied value field
Then I should insert <number> in applied value field
Examples:
| number |
| 0 |
| 12,20 |
| 158 |
| 1578,899 |
| 13414 |
| 1347014 |

Scenario: Validate zero in applied value field from web
When I set "0" in applied value field
And I fill the form
And I click on "Cadastrar" button
Then It should see a pop-up with a message "Falha ao processar a solicitação."

Feature: Validate quantity in fund from web

Background:
Given I logged in kinvo from web
And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"

And I select "Por quantidade e preço" option in apply in "Aplicar por"

Scenario: Insert letter in quantity field in fund from web
When I try to set letters in quantity field
Then It should be not possible insert letter in quantity field

Scenario: Insert special character in quantity field from web
When I try to set special character in quantity field
Then It should be not possible insert special character in quantity field

Scenario Outline: Insert number in quantity field from web
When I set <number> in quantity field
Then I should insert <number> in quantity field
Examples:
| number |
| 0 |
| 12,20 |
| 158 |
| 1578,899 |
| 13414 |
| 1347014 |

Scenario: Validate zero in quantity field from web
When I set "0" in quantity field
And I fill the form
And I click on "Cadastrar" button
Then It should see a pop-up with a message "Quantidade deve ser maior do que zero."

Feature: Validate price in fund from web

Background:
Given I logged in kinvo from web
And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"
And I select "Por quantidade e preço" option in apply in "Aplicar por"

Scenario: Insert letter in price field in fund from web
When I try to set letters in price field
Then It should be not possible insert letter in quantity field

Scenario: Insert special character in price field in fund from web
When I try to set special character in price field
Then It should be not possible insert special character in price field

Scenario Outline: Insert number in price field in fund from web
When I set <number> in price field
Then I should insert <number> in price field

Examples:
| number |
| 0 |
| 12,20 |
| 158 |
| 1578,899 |
| 13414 |
| 1347014 |

Scenario: Validate zero in price field in fund from web
When I set "0" in quantity field
And I fill the form
And I click on "Cadastrar" button
Then It should see a warning message "INFORME VALOR PAGO PELA COTA."

Feature: Validate time in fund from web

Background:
Given I logged in kinvo from web
And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"

Scenario: Insert letter in time field in fund from web
When I try to set letters in time field
Then It should be not possible insert letter in time field

Scenario: Insert special character in time field in fund from web
When I try to set special character in time field
Then It should be not possible insert special character in time field

Scenario: Insert invalid time in time field in fund from web
When I set an invalid time in time field
Then I should see a warning message "INFORME UMA DATA VÁLIDA."

Scenario: Validate no time in time field in fund from web
When I do not set time field
And I fill the form
And I click on "Cadastrar" button
Then It should see a warning message "INFORME A DATA DE INÍCIO."

Feature: Validate fund form from web

Background:
Given I logged in kinvo from web
And I click on "Gerenciar ativos"
And I click in "Adicionar produto"
And I click in "Fundo"

Scenario Outline: Empty field form validation in fund from web
When I fill the form without insert only the <Field>
And I click on "Cadastrar" button
Then I should not add a new product
Examples:
 | Field |
 | Instituição Financeira |
 | Fundo |

 | Valor aplicado |
 | Quantidade |
 | Valor da cota |
 | Data de início |

Scenario Outline: Wrong data field form validation in fund from web
When I fill the form with a wrong data only in the <Field>
And I click on "Cadastrar" button
Then I should not add a new product
Examples:
 | Field |
 | Instituição Financeira |
 | Fundo |
 | Aplicar por |
 | Valor aplicado |
 | Quantidade |
 | Valor da cota |
 | Data de início |

Scenario: Add fund from web
When I fill the form with valid data
And I click on "Cadastrar" button
Then I should see a pop-up with a message "Produto cadastrado com sucesso!"
And I should see a warning pop-up with a message "Consolidação necessária. Clique aqui para recarregar a página."

#Add "Pension"
Feature: Validate placeholder name in pension from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"
 And I click in "Previdência"

Scenario: Search pre saved placeholder name in pension from web
When I set part of some placeholder name in placeholder field

Then I should see a list of full name of placeholder with the part inserted in the placeholder name field

Scenario: Insert pre saved placeholder name in pension from web
 When I set part of some placeholder name in placeholder field
 And I choose a full name of one placeholder
 Then The full placeholder name should be inserted in the placeholder name field

Scenario: Search non pre saved placeholder in pension from web
 When I set some name different from any part of placeholder's name in placeholder field
 Then I should see the message "Nada encontrado"
 And The data should keep in the placeholder field
 And I should see the warning message "SELECIONE UMA INSTITUIÇÃO FINANCEIRA"

Scenario: Over the Maxlength placeholder field validation in pension from web
 When I try fill the placeholder field with more than 100 characters
 Then The field should stop the insertion on 100 characters

Scenario: Maxlength placeholder field validation in pension from web
 When I fill the placeholder field with 100 characters
 Then every characters should be inserted

Feature: Validate fund in pension from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"
 And I click in "Previdência"

Scenario: Search pre saved fund name in pension from web
 When I set part of some fund name in fund field
 Then I should see a list of full name of fund with the part inserted in the fund name field
Scenario: Search pre saved fund cnpj in fund from web
 When I set part of some fund cnpj in fund field
 Then I should see a list of full name of fund with the part inserted in the fund name field

Scenario: Insert pre saved fund name in pension from web
 When I set part of some fund name in fund field
 And I choose a full name of one fund
 Then The full fund name should be inserted in the fund name field

Scenario: Search non pre saved fund name in pension from web
 When I set some name different from any part of fund's name
 Then I should see the message "Nada encontrado"
 And The data should keep in the fund field
 And I should see the warning message "SELECIONE UM FUNDO"

Scenario: Search non pre saved fund cnpj in pension from web
 When I set some cnpj different from any part of fund's cnpj
 Then I should see the message "Nada encontrado"
 And The data should keep in the fund field
 And I should see the warning message "SELECIONE UM FUNDO"

Scenario: Over the Maxlength fund field validation in pension from web
 When I try fill the fund field with more than 100 characters
 Then The field should stop the insertion on 100 characters

Scenario: Maxlength fund field validation in pension from web
 When I fill the fund field with 100 characters
 Then every characters should be inserted

Feature: Validate applied value in pension from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"
 And I click in "Previdência"

Scenario: Insert letter in applied value field in pension from web
 When I try to set letters in applied value field
 Then It should be not possible insert letter in applied value field

Scenario: Insert special character in applied value field in pension from web
 When I try to set special character in applied value field
 Then It should be not possible insert special character in applied value field

Scenario Outline: Insert number in applied value field in pension from web
 When I set <number> in applied value field
 Then I should insert <number> in applied value field
 Examples:

| number |
| 0 |
| 12,20 |
| 158 |
| 1578,899 |
| 13414 |
| 1347014 |

Scenario: Validate zero in applied value field in pension from web
 When I set "0" in applied value field
 And I fill the form
 And I click on "Cadastrar" button
 Then It should see a pop-up with a message "Falha ao processar a solicitação."

Feature: Validate time from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"
 And I click in "Previdência"

 Scenario: Insert letter in time field in pension from web
 When I try to set letters in time field
 Then It should be not possible insert letter in time field

 Scenario: Insert special character in time field in pension from web
 When I try to set special character in time field
 Then It should be not possible insert special character in time field

 Scenario: Insert invalid time in time field in pension from web
 When I set an invalid time in time field
 Then I should see a warning message "INFORME UMA DATA VÁLIDA."

 Scenario: Validate no time in time field in pension from web
 When I do not set time field
 And I fill the form
 And I click on "Cadastrar" button
 Then It should see a warning message "INFORME A DATA DE INÍCIO."

Feature: Validate pension form from web

Background:
 Given I logged in kinvo from web
 And I click on "Gerenciar ativos"
 And I click in "Adicionar produto"
 And I click in "Previdência"

Scenario Outline: Empty field form validation in pension from web
 When I fill the form without insert only the <Field>
 And I click on "Cadastrar" button
 Then I should not add a new active
 Examples:
  | Field |
  | Instituição financeira |
  | Fundo |
  | Valor aplicado |
  | Data de início |

Scenario Outline: Wrong data field form validation from web
 When I fill the form with a wrong data only in the <Field>
 And I click on "Cadastrar" button

Then I should not add a new active

Scenario: Add pension from web
  When I fill the form with valid data
  And I click on "Cadastrar" button
  Then I should see a pop-up with a message "Produto cadastrado com sucesso!"
  And I should see a warning pop-up with a message "Consolidação necessária. Clique aqui para recarregar a página."

#Add Active from app

#Add Stocks, BDR, ADR, FII e Reits
Feature: Validate placeholder name in stocks from app

Background:
  Given I logged in kinvo from app
  And I click on "+"
  And I click in "Adicionar novo ativo"
  And I click in "Ações, Stocks e ETF"

Scenario: Search pre saved placeholder name in stocks from app
  When I set part of some placeholder name in placeholder field
  Then I should see a list of full name of placeholder with the part inserted in the placeholder name field
  And I should see "Avançar" button enable

Scenario: Insert pre saved placeholder name in stocks from app
  When I set part of some placeholder name in search field
  And I choose a full name of one placeholder
  Then The full placeholder name should be selected
  And I should see "Avançar" button enable

  When I am in screen 3
  Then I should see "Avançar" button disable

 Scenario: Insert invalid time in time field from app
  When I set an invalid time in time field
  Then I should see a warning message "Informe uma data válida"

 Scenario: Validate time in stocks from app
  When I set a valid time
  Then I should see quantity field
  And I should see price field
  And I should see tax field
  And I should see total field
  And I should see "Avançar" button disable

 Feature: Validate quantity in stocks from app

 Background:
  Given I logged in kinvo from app
  And I click on "+"
  And I click in "Adicionar novo ativo"
  And I click in "Ações, Stocks e ETF"
  And I click in "Avançar"
  And I select a tricker
  And I click in "Avançar"
  And I insert a valid time

 Scenario: validate 0 in quantity field in stocks from app
  When I insert "0" in quantity field
  Then I should see a warning message "Por favor, informe um valor maior que 0"
  And I should see "Avançar" button disable

 Scenario: validate quantity field in stocks from app
  When I insert a valid number in quantity field
  Then I should see a checked image in quantity field

 Feature: Validate price in stocks from app

Background:
 Given I logged in kinvo from app
 And I click on "+"
 And I click in "Adicionar novo ativo"
 And I click in "Ações, Stocks e ETF"
 And I click in "Avançar"
 And I select a tricker
 And I click in "Avançar"
 And I insert a valid time

 Scenario: validate 0 in price field in stocks from app
 When I insert "0" in price field
 Then I should see a warning message "Por favor, informe um valor maior que 0"
 And I should see "Avançar" button disable

 Scenario: validate price field in stocks from app
 When I insert a price in price field
 Then I should see a checked image in price field

 Feature: Validate the screen three in stocks from app

 Background:
 Given I logged in kinvo from app
 And I click on "+"
 And I click in "Adicionar novo ativo"
 And I click in "Ações, Stocks e ETF"
 And I click in "Avançar"
 And I select a tricker
 And I click in "Avançar"
 And I insert a valid time

 Scenario: Insert valid data in screen 3 in stocks from app
 When I set a valid number in quantity field
 And I set a valid number in quantity field
 Then I should see total field filled with price * quantity
 And I should see "Avançar" button enable

 Scenario: Go to screen 4 in stocks from app
 When I set a valid number in quantity field
 And I set a valid number in price field
 And I click in "Avançar" button
 Then I should go to next screen
 And I should see the screen indicator in screen 4

 Feature: Add stocks from app

 Background:
 Given I logged in kinvo from app

And I click on "+"
And I click in "Adicionar novo ativo"
And I click in "Ações, Stocks e ETF"
And I click in "Avançar"
And I select a tricker
And I click in "Avançar"
And I insert a valid time
And I insert a valid quantity
And I insert a valid price
And I click in "Avançar"

Scenario: Validate stock information in stocks from app
 When I am on screen 4
 Then I should see a summary of previous data inserted
 And I should see "Avançar" button enable

Scenario: Add stock in stocks from app
 When I am on screen 4
 And I click in "Adicionar" button
 Then I should see a message "Adicionado com sucesso"
 And I should see "Adicionar um novo ativo" button
 And I should see "Adicionar uma nova ação" button
 And I should see "close" button

#Add fund in app
Feature: Validate placeholder name in fund from app

Background:
 Given I logged in kinvo from app
 And I click on "+"
 And I click in "Adicionar novo ativo"
 And I click in "Fundos"

Scenario: Search pre saved placeholder name in fund from app
 When I set part of some placeholder name in search field
 Then I should see a list of full name of placeholder with the part inserted in the search field
